

Isis reporting solutions for SAP report painter services for SAP finance and controlling

SAP enhancement packs

Invenio enhancement packs are a range of pre-configured value added solutions that enable you to quickly automate and execute a range of processes within the finance function. These packs are only available from Invenio for the SAP platform. If required, they can be customised to your precise requirements in order to absolutely support the way that you do business.

In creating these enhancements, Invenio have drawn upon the experience and specialist knowledge of our entire team of SAP consultants. The result is the blueprint for a robust, stable and reliable configuration that adheres to SAP implementation best practice and is delivered using proven methodologies.

SAP Report Painter expertise for the finance function

Does your finance team need faster access to customisable reports within SAP?

Unless you are one of the rare companies that have a specialist who offers an in-depth understanding of SAP report writing AND extensive expertise in the reporting needs of a finance function, then it's likely that you'll be experiencing one or more of the following problems:

- An over-reliance on spreadsheets for reporting - leading to version control issues, data inconsistencies and security concerns.
- Long lead times from IT for report writing requests – resulting in delays in publishing financial information.
- A report writing team that lacks experience in the finance function - meaning reports need multiple rewrites.
- Changes in core business processes, new business acquisitions or a change in corporate goals or strategic objectives - resulting in report obsolescence and a lengthy rewriting exercise.
- Minor changes needed to existing report sets that take many days – sometimes even weeks –leading to delays across numerous financial activities (i.e. budgeting & planning).
- Unnecessary expenditure in skilling finance staff in understanding and maintaining a range of expensive (and unnecessary) third party reporting tools.

Isis includes:

- financial statements
- revenue & margin reporting in COPA
- divisional profitability (without activating materials ledger)
- cost centre / cost element reporting
- customised FAGLFLEX reports to suit company reporting
- drilldown functionality where required
- period-wise plan actual reports in cost centre or profit centre accounting

Our Report Painter team comprises accounting specialists with an extensive skill base in writing, designing, tailoring and adapting SAP Report Painter to give you precisely what you need.

To help overcome these issues Invenio offer a fast, responsive report writing service for SAP Report Painter - the primary tool for defining reports in the SAP finance and controlling modules. Most of the controlling reports (i.e. cost centre accounting, internal orders and profit centre accounting) are created using Report Painter. With Report Painter, your reports are defined quickly and simply across rows and columns. This means we can use standard reports delivered by SAP as a base, copy them and do minor modifications so that they suit your precise requirements. And, if there are no reports available to suit your needs, then we offer just the right amount of expertise needed to create the reports from scratch.

We've staffed our Isis Report Painter team with financial experts (many of them qualified accountants) who have an extensive skill base in writing, designing, tailoring and adapting SAP Report Painter to give you precisely what you need. This means that by instructing Invenio to take care of your reporting needs you can save time, money and get to your information quickly and easily. Your information will be available in an easy to understand, easy to manipulate format with drill-down where necessary – and, best of all, there is no need to involve costly, time constrained internal report programmers and consultants to create the reporting for you.

Examples of our customisable report expertise include:

- Financial Statements.
- Revenue and margin reporting in COPA.
- Divisional Profitability (without activating materials ledger).
- Cost centre / cost element reports.
- Customised FAGLFLEX reports tailored to suit company reporting.
- Drilldown functionality where required.
- Period-wise plan actual reports in cost centre or profit centre accounting.

Invenio is here to help you administer, support and develop your SAP solution so that you can get on with running your business efficiently and profitably. If you'd like to learn more about how we can help your business, please call us on +44 (0)330 440 1800.

"We find Invenio a very professional and trustworthy organisation and they add real value to the project rather than just 'box ticking' their way through the implementation."

Graham Terry - Director, SPP Pumps

"...we are proud to have you as a member of our team..." and "appreciate your commitment, hard work and dedication to achieve a successful and timely migration..."

John Santos – Head of Service Delivery, Siemens UK

"...we would not have been where we are without Invenio's proactive approach and dedication and we will extend our relationship further by actively considering Invenio for our offshore development ..."

Nick Murrey – IT Director, Neopost
